SYSTEM VALIDATION CHECKLIST FOR RVR SQUARED MECHANICAL ENGINEERING SERVICES (SMES) FINANCIAL MANAGEMENT SYSTEM

The purpose of this validation plan and process is to ensure that the developed Financial Management System performs as intended, is reliable, and complies with the industry standards and regulatory. This document defines the validation objectives, scope, approach, and checklist that will guide the validation activities.

Objectives

This validation plan aims to:

1. Demonstrate that the financial management system fulfills user requirements related to project financial data recording and reporting.
2. Ensure that all critical financial functions, such as expense recording, client payment logging, and core financial statements generation work consistently and accurately.
3. Verify that the system adheres to industry practices, standards, and accounting principles.

System Overview/Scope

The RVR SMES Financial Management System provides structured financial processes by enabling expense tracking, project monitoring, and financial reporting. The system implements role-based access levels for Admin, Finance, and Client/End Users.

Admin - has full access to all system features, including user management and system logs.

Finance - Access to finance-related modules for recording and managing transactions, as well as for approving projects.

Client/End Users - Approval feature for pending projects and view-only access to monitor project progress and updates.

Key features:

- Client and Project Management - this enables Admin to add clients and link specific projects. Finance's role on this feature is to view and approve project contracts before recording financial transactions.
- Expense and Payment Recording - allows both Admin and Finance to log daily company and project-related expenses.

- Project Status Updates - provides functionality for Admin and Finance to update project progress visible to Client/End User.
- User and Logs Management - exclusive to admin for managing user accounts and monitor activity logs for accountability and security.

VALIDATION CHECKLIST

Client and Project Management Module	YES	NO	COMMENTS
1. Admin can add, update, and view client records.	☐	☐	
2. The system prevents duplicate client records via validation checks.	☐	☐	
3. Admin can create projects linked to the correct client.	☐	☐	
4. Finance users can view client and project details but cannot edit them.	☐	☐	
5. Clients can only view and approve their project progress, not modify it.	☐	☐	
Expense and Payment Recording Module	YES	NO	COMMENTS
1. Admin and Finance can record expenses and payments with required details.	☐	☐	
2. Expenses are accurately linked to projects when saved.	☐	☐	
3. The system prevents duplicate invoice numbers and receipts.	☐	☐	
4. System validates uploaded receipts to ensure they are valid	☐	☐	
5. Only JPG and PDF file types are accepted for receipts and supports up to 5MB only.	☐	☐

Chart of Accounts Management	YES	NO	COMMENTS
1. Admin and Finance can add new account titles, but cannot modify or delete existing ones.	☐	☐	
2. Account titles can be used properly across transaction forms.	☐	☐	
3. Each account title must be viewable with details (type, number, assigned form).	☐	☐	
4. Account titles are assigned automatically by type (Assets start at 1001, Liabilities at 2001, etc.).	☐	☐	
5. The system prevents duplicate account titles or numbering conflicts.	☐	☐	
Project Status/Updates	YES	NO	COMMENTS
1. Admin and Finance can update project phase/status accordingly.	☐	☐	
2. Clients are restricted to view-only access for project status.	☐	☐	
3. Status updates display correctly and provide enough details for each phase.	☐	☐	
4. Each phase is assigned on a different level of percentage based on the weight of its workload.	☐	☐	
5. Updates made by Admin or Finance are visible to all user levels.	☐	☐	
Manage Users Module	YES	NO	COMMENTS
1. Admin can create, edit, assign roles, and disable users.	☐	☐	
2. Role assignment on each user works correctly, allowing access only to actions permitted by their role.	☐	☐

3. Disabled users cannot login.	☐	☐	
4. Password reset functionality sends real-time email notification to the user.	☐	☐	
5. User creation requires a unique email/username (no duplicates allowed).	☐	☐	
System Logs Module	YES	NO	COMMENTS
1. All user actions are captured in logs (login, create, update, archive, logout).	☐	☐	
2. Logs must include timestamp, user ID, and activity description.	☐	☐	
3. Admin can view and filter logs by date and activity type.	☐	☐	
4. Logs are prevented from deletion or modification.	☐	☐	
5. Multiple login attempts of all users are tracked by the admin.	☐	☐	
Financial Statements Generation	YES	NO	COMMENTS
1. Balance Sheet generates correctly from recorded transactions.	☐	☐	
2. Income Statement properly reflects revenues and expenses.	☐	☐	
3. Cash Flow Statement aligns with inflows/outflows.	☐	☐	
4. Financial reports update in real-time when new data is added.	☐	☐	
5. Statements can be exported in PDF.	☐	☐

General System Requirements	YES	NO	COMMENTS
1. The system rejects incorrect credentials with clear error messages.	☐	☐	
2. Session timeout occurs automatically after thirty (30) minutes of inactivity.	☐	☐	
3. The system locks finance and client/end users accounts after five (5) unsuccessful login attempts for thirty (30) minutes.	☐	☐	
4. Errors are displayed simultaneously next to or near the relevant input field.	☐	☐	
5. If validation fails, previously entered data for transaction forms should remain populated in the form to prevent re-entry.	☐	☐
