

PART 1 - Introduction: RVR SMES for RVR Squared Mechanical Engineering Services

1. Overview

1.1 Objectives

1.2 User Types

The Financial Management System supports three main types of users, each with defined roles, permissions, and access privileges to ensure data integrity and secure operations.

Admin - This Admin User has full control over the entire system. This user is responsible for configuring, maintaining, and managing system data. The Admin user can:

- Add, edit, and view client details.
- Add, edit, and cancel projects.
- Add project add-ons.
- Update project phase status.
- Add progress update to Client.
- Set a limit for the project budget summary.
- Record and view financial transactions (Project Expenses, Company Expenses, and Payment Transactions).
- Manage chart accounts.
- Access all financial reports.
- Assign user roles and manage user accounts.
- Manage system archives and activity logs.
- Receive notifications for projected budget summary alerts.

Finance - The Finance User primarily handles the financial aspects of the system. This role focuses on reviewing, verifying, and approving financial data. The Finance user can:

- View client and project details.
- Approve project purchase orders (PO).
- Update project phase status.
- Add progress update to Client.
- Record and view financial transactions (Project Expenses, Company Expenses, and Payment Transactions).
- Access all financial reports.
- Receive email and system notifications for new projects to approve.

Client - The Client User represents the customer or company that avails the services of RVR Squared Mechanical Engineering Services. Once added by the Admin, the client automatically receives an email containing their dedicated user account credentials. The Client user can:

- Approving or confirming projects through the PO number submission process.
- Viewing details of assigned projects, including PO number and project status.
- Monitoring project progress and receiving notifications for any status updates or approvals.

1. **System Requirements**
2. **Starting Up**

Open the web browser and access the system URL.

The developers recommend using Google Chrome or Microsoft Edge as the preferred browsers for accessing the Financial Management System. These browsers ensure better performance, compatibility, and security compared to other web browsers.

If you do not have these browsers installed on your device, you may download them using the links provided below.

Google Chrome: https://www.google.com/intl/en_ph/chrome/

Microsoft Edge: [Download Microsoft Edge](#)

PART 2 - Quick Start Guide

1. Website Browsing and User Role Login.

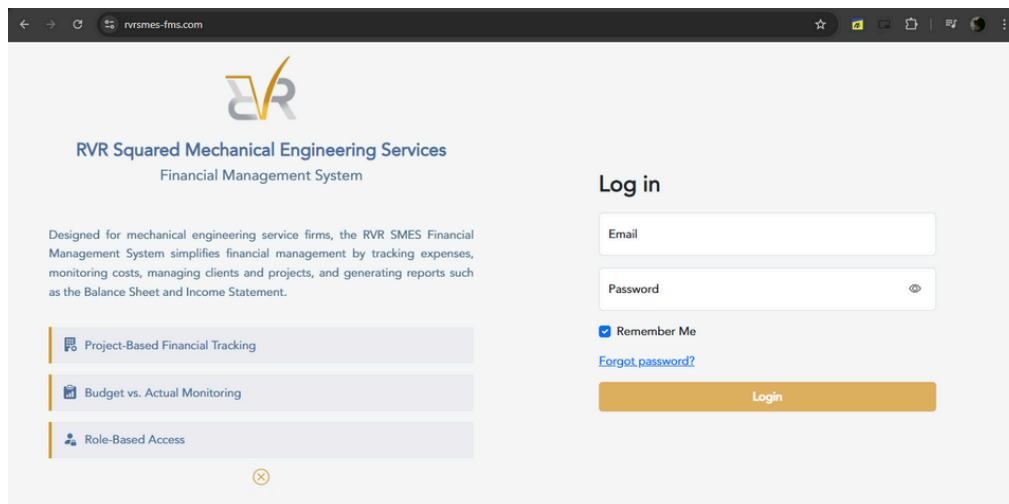

1.1 Accessing RVR SMES

1. To access RVR SMES, open your preferred web browser. It's either using Chrome or Microsoft Edge.
2. Once your browser is open, type the system's URL in the **address bar**.

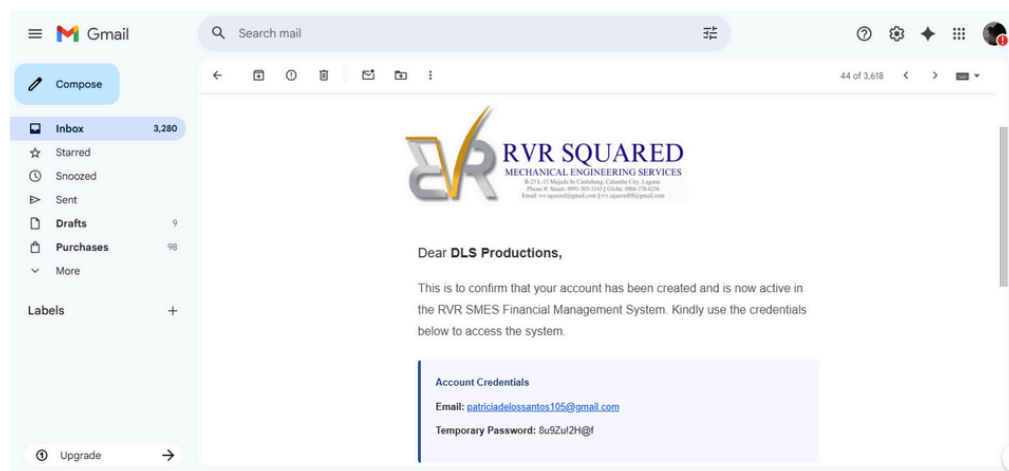

<https://rvrsmes-fms.com/>

1.2 Logging In by User Role

1. When the **Financial Management System** login page appears, enter your **email address** and **password** in the corresponding input fields.
 - The system administrator provides login credentials.

- Clients automatically receive their login email and password through the system after being added by the admin.

2. Click the **“Login”** button or press **Enter** to access your user dashboard.
3. The system identifies users based on their assigned roles:

Admin User – Can manage clients, create and approve projects, monitor transactions, and oversee the entire system.

Finance User – Can view and approve projects, manage financial records, and encode project-related transactions.

Client User – Can view assigned projects, approve pending projects, and receive system notifications and project updates.

4. After successful login, the system will automatically redirect you to the **Dashboard** corresponding to your user role.

2. Navigation Basics

The **RVR SMES** is designed with a user-friendly interface for efficient navigation. Upon successful login, the system dashboard will display several key components, as shown below:
